AUTHOR Dominice, Pierre; Finger, Matthias
TITLE World Perspective Case Descriptions on Educational Programs for Adults: Switzerland.
SPONS AGENCY Kellogg Foundation, Battle Creek, Mich.
PUB DATE Aug 89
NOTE 91p.; This series includes thirty-two documents (CE 053-003-034) covering Argentina to Yugoslavia. The first 78 pages of each document are identical introductory matter. Subsequent pages exhibit a variety of legibility problems.
PUB TYPE Reports - Descriptive (141)

EDRS PRICE MF01/PC04 Plus Postage.
DESCRIPTORS Adult Education; *Agricultural Colleges; *Agricultural Education; Case Studies; *Faculty Development; Foreign Countries; Higher Education; *Inservice Teacher Education
IDENTIFIERS *Switzerland

ABSTRACT

The case description of an adult education program in Switzerland contained in this document, is part of a set that reflects a cooperative effort by adult educators to increase international understanding of various educational programs for adults in their societal context. A face sheet provides this information: name, organization, and address of the person who prepared the case description; program name or title; type of program; type of organization with which the case program is associated; and basic characteristics of service. This case description, entitled Formative Research in Swiss French Agriculture Schools, discusses a 3-year program to improve teachers' pedagogical abilities in seven schools of agriculture. In addition to the case description, this document includes information on the World Perspective case study project, indexes of all cases by country and by category, and guidelines for contributors. WORLD PERSPECTIVE CASE DESCRIPTIONS OF EDUCATIONAL PROGRAMS FOR ADULTS

PREFACE

This set of case descriptions reflects an inspiring cooperative effort by adult educators in many countries to increase international understanding of various educational programs for adults in their societal context. The benefits from reading these case descriptions result from the contributions of case coordinators and authors who arranged for and prepared the descriptions included in the set.

Cooperating case coordinators contributed in several important ways. In addition to sometimes writing one or more case descriptions, coordinators arranged for case authors. The selection of program areas and case authors reflects the case coordinators' professional judgment based on familiarity with educational programs for adults in their country. The list of names and addresses of case coordinators for each country is noted on green paper following the Table of Contents.

The names and addresses of case authors are on the face sheet that precedes each case description. Each case description is unedited and unchanged, in the form that the author submitted it. The few case descriptions that were translated into English are so noted.

As an aid to comparative analysis, each case coordinator was sent a set of guidelines, to be shared with case authors as they prepared their case descriptions. At the start of the project, active case coordinators received draft guidelines and their comments were used to revise the guidelines used in the project. These guidelines are included at the end of the set of cases and are printed on blue paper. Many authors were very conscientious in following

the guidelines. Even those case descriptions that depart from the suggested format contain useful information about the program.

Each case coordinator who submitted case descriptions has been sent a complete set. This international set of cases can be useful for comparative analysis in several ways. Some coordinators have indicated their intent to contact coordinators in other countries, to collaborate on cross national analysis for specific programs. Within a country, these may be colleagues and students who would like to conduct comparative analysis studies. In at least four countries, all of the case descriptions for that country are being disseminated to interested adult educators in the country.

Arrangements have been made to send a complete set of case descriptions that have been received by the end of the project late in 1988, to the ERIC Clearinghouse on Adult, Career, and Vocational Education at Ohio State University, USA, so that print or microfiche copies can be obtained by anyone interested. All cases from each country have been grouped together as a set on one ERIC document and the set was given an ED number. Therefore, you or other people can purchase microfiche or paper copies of the set for any country in the World Perspective series. For a list of ED numbers and prices for each of the sets, write to the ERIC Clearinghouse on Adult, Career, and Vocational Education, 1960 Kenny road, Columbus, Ohio 43210-1090, USA, ATTN: World Perspective Case Descriptions of Educational Programs for Adults. In response, a listing and order form will be sent.

Many people and organizations have helped with this largely volunteer project, in addition to the fundamental contributions by the case coordinators and authors. Support from the W. K. Kellogg Foundation made feasible many logistical arrangements including duplicating and postage. Many people prominent in adult education internationally were generous with advice and suggestions concerning potential case coordinators. The International Council

for Adult Education provides a vehicle for continued contact among all of us interested in cross national adult education research and understanding.

ACCESSING THE CASE MATERIAL

The organization of this great stack of cases is intended to facilitate their use. (The case coordinators now know why a paperweight was selected as a form of recognition.)

The Table of Contents (which is on pink paper following this Preface) is sequenced by country in alphabetical order by category, as are the full set of cases. Reviewing all cases from a country is easy because they are grouped together. The cases are on three hole paper for ease in grouping and adding more cases.

The numbering of cases is as follows. The first (or two digit) number designates the country (Australia is 2, Ireland is 22, etc.) and a list of country codes follows (missing numbers in the sequence are for countries from which cases have not yet been received).

1 - Argentina
2 - Australia
4 - Cameroon
5 - Canada
6 - China
7 - Chile
9 - Czechoslovakia
13 - Finland
15 - Germany, Federal Republic
16 - Ghana
17 - Greece
19 - Hong Kong
20 - Hungary
21 - India
22 - Ireland
23 - Israel
24 - Italy
23 - Israel
24 - Italy
25 - Japan
26 - Korea, Demo. People's Republic
29 - Netherlands
30 - Nigeria
31 - Norway
33 - Portugal
34 - Saudi Arabia
35 - St. Lucia
36 - Sweden
37 - Switzerland
38 - Tanzania
40 - United Kingdom
41 - United States
42 - Union of Soviet Socialist Republics
45 - Yugoslavia

Following the country code, each case has been given an alphabetic code (A,B,C,etc.) to distinguish that case from the others. A slash "/" follows the alphabetic code. Following the "/" is the pagination with the first page

consisting of the Face Sheet that authors were asked to complete. The coded pagination is on the lower right hand corner of each sheet of paper.

Following the Table of Contents, is an Index (on blue paper) organized by Category of Case. This allows readers interested only in cases in a specific category (such as Literacy or Citizen) to easily locate them. Because some cases are indexed in several categories, they are cross indexed for all categories that apply. The categories and criteria for determining the category follows. Because authors usually selected the category(ies) for their case and may not be consistent across all cases, it may be desirable to consult several pertinent categories.

A. LITERACY - Functional literacy and adult basic education programs (as defined in each nation) with special attention to literacy campaigns, local community groups, role of schools and efforts to include types of adults often neglected, such as prisoners.

B. AGRICULTURE - Extension programs to help farmers and peasants improve productivity (subsistence and cash) and quality of rural life with special attention to efforts by local community groups, ministry of agriculture and agricultural schools and colleges.

C. WORKERS - Educational programs to increase productivity and job change of all types of urban business and industry workers (aside from professionals), with special attention to efforts by enterprises, employers workers universities, labor unions, and trade associations.

D. PROFESSIONAL, TECHNICAL - All types of professional development and in-service programs for people in scientific and technical occupations such as engineering, and medicine, with special attention to efforts by universities, professional associations, and enterprises (factories, hospitals).

E. PROFESSIONAL, OTHER - Continuing professional education activities for any other types of occupations, that tend to be less influenced by new research findings (such as law, social work, teaching).

F. SECONDARY - Part-time secondary school completion programs, with special attention to efforts by schools and ministry of education.

G. HIGHER - Part-time or short term college and university completion programs for working adults, with attention to ministry of education and higher education institutions. In some nations this category may include part-time pursuit of formal credit and degree programs.

H. HEALTH - Preventative and curative health education programs for adults in urban or rural areas, with attention to efforts by ministry of health and local hospitals and clinics.

I. FAMILY - Family life and home economics education (including food preparation, nutrition, child development, and family relations), with attention to local providers.

J. PERSONAL - All types of educational activities related to leisure time, hobbies, arts, cultural affairs, personal enrichment, and general education, with attention to efforts by ministry of culture, and local libraries and museums.

K. CITIZEN - Educational activities related to community and organizational leadership and problem solving to enable adults to become more informed and participating citizens at local or wider levels to reform or sustain government, with attention to government, educational institutions, and voluntary associations. This may include international issues.

L. DISADVANTAGED - Special or compensatory educational programs for adults who are in hard to reach populations such as people with handicaps or a history of discrimination.

M. OTHER - Any other type of educational program for adults that is important in your nation, for which someone will prepare a case description, such as adult religious education or other examples.

(NOTE: Some important programs combine several categories. For example, in Latin America, popular education may include program emphases from categories A, B, C, K).

OVERVIEW OF AE IN COUNTRY OR REGION

The cooperation and exchange already evidenced in the preparation of this set of case descriptions, combined with the plans for analysis and continued colleagueship, suggests a great potential for ongoing sharing and international understanding. We hope to hear from you.

2. Actual program

3. Title: **Formative research in swiss french agriculture schools**

4. Type of program: Continuing professional education

5. Type of organization the program is associated with: Agriculture schools

6. Characteristics of service area:
   A. Geographic size: French part of Switzerland
   B. Population: 2 millions
   C. Rural

7. Years covered by the program: 1986, 1987, 1988

Case study

Formative research in swiss french agriculture schools

Pierre DOMINICE and Matthias FINGER

A. Setting

There exist seven agriculture schools in the french part of Switzerland; financially all the schools are independent of each other. They depend on the government of the district ("canton") and are partly financially supported by the swiss federal government on specific issues. In the matter of content all the seven schools have to apply the same federal program; nevertheless, there exists a very large freedom in this matter of application.

These seven agriculture schools cover the totality of the swiss french basic and continuing agriculture education, i.e., an area of about 2 Mio. of inhabitants, of which about 6% are farmers.

The schools are of unequal size, the biggest one having around 900 pupils and over 30 full time teachers, whereas the smallest one has some 10 pupils and mainly part time teachers. Other inequalities between the schools stem from the fact that some combine research in agriculture with teaching, whereas others do nothing else than the teaching.

All the schools have in common that their teachers are trained as engineers in agriculture, without any kind of education in pedagogy.

The program intends to provide this pedagogical education to the swiss french agriculture teachers in the form of continuing education.

The provider organization is a group of four adult educators working on their own, but being all employed at the Subdivision of Adult Education at the University of Geneva.

37A/2

B. Outcomes

1. Goals

The **goals** of this three-year program (ongoing) are to improve the pedagogical capacities of the teachers; this is done on the basis of a critical reflection about the problems these teachers actually encounter in their practice.

The **content** of the program is defined on the basis of the needs of the teachers, who also evaluate the intended outcomes.

The goals of the program are elaborated together with the teachers of each school separately; these goals are continually revised during the program. Therefore, on the basis of the fundamental goal of improving the teachers pedagogical capacities, different subgoals are defined with teachers of each school.

The **intended societal benefit** of the whole program is to promote an agriculture education which is as close as possible to the actual questions and needs of the practicing (and future) agriculture teachers, as well as farmers. This may even include a revision of the content of the teaching program in order to take into account crucial questions of modern agriculture (like for example soil pollution and soil erosion. etc.).

2. Benefits

The program has been going on since two years, with one more year to go. Feedbacks about the benefits of the program have only been obtained, as far as now, in an unsystematic way, from the teachers. The program as a whole has not yet been evaluated.

Moreover, it will be difficult, if not impossible, to measure the benefits for the swiss french farmers in general, since such benefits will show only in the long term.

C. Process

1. Planning

Program planning is the result of a negociation between the group of the adult educators (providers) on the one hand and the directors of the seven agriculture schools on the others. On the basis of an initial project, the program is discussed with the teachers of each agriculture school, since the specificity of each school has particularly to be taken into account (for example: Mountain areas, wine production areas, etc.).

It is planned that in the future the interested schools will establish a common program of pedagogical continuing education for the questions and problems all the schools do share.

2. Methods

The method used is the one of the so-called **formative-research**; this is a method the group of adult educators has been developing and applying already in other contexts. This method brings the agriculture teachers to learn by:

- identifying their own pedagogical difficulties;
- by reflecting critically (in the group) about the various solutions which the teachers individually have already found to solve these difficulties;
- by systematizing these answers into a program of continuing pedagogical education; and
- by formulating their specific pedagogical needs to which no answer has

yet been found.

In doing so, mainly methods of group dynamics and interviews (with individuals) are used, in particular techniques which facilitate communication and critical reflection among the participants. The long term aim is to bring these different groups of teachers to function autonomously: they should learn how to make use of external adult educators.

3. Improvements

Improvements do happen on different levels simultaneously:

- The most immediate improvement stems from the fact that the teachers are made conscious of the pedagogical dimension of their activity. They learn to observe themselves, as well as to identify clearly their problems and needs.
- Within each school, teachers are brought to communicate about pedagogy, which leads in particular to an improvement in the coordination of the teaching programs.
- Finally, on the topics where no answer can be found by the teachers themselves, conferences, courses and week-ends are organized; their aim is to improve the technical competence of the teachers on very specific topics.

4. Participation

Though for the teachers of each school the participation is not compulsory, the program is promoting a climate which makes it difficult for each teacher to stay apart. The long term aim is to promote a pedagogical culture within each school, where problems pertaining to the education of future farmers are regularly discussed among teachers, where possible solutions are outlined and executed and where results are evaluated.

D. Inputs

1. Participants

About 80% of all the teachers of the swiss french agriculture schools have been in contact with the program. Half of them have been in contact with the program for two years already, the other half for one year only. Depending on the school, the program mobilizes the teachers for 2, 3 or 4 full days a year.

2. Needs

In all the schools the main problems the teachers encounter stem from the lack of motivation of the pupils (i.e. future farmers); the teachers do put this lack of motivation into a relation with the teaching programs, which are often felt as being inadequate. Therefore, the program cannot concentrate exclusively on the traditional pedagogical means, but must also take into account the structure and the context of the programs.

3. Staff

The basic staff of the program for the three years is composed of a team of four part-time adult educators. On specific topics, and in particular for conferences, specialists from outside the team are hired.,

4. Content

The main contents addressed in the program are:

- pedagogical (evaluation, heterogeneity of the classes, the relation between theory and practice);
- relational (motivation, discipline, knowledge about the life and the environment of the students);
- didactical (teaching material); and

- organizational (review of the teaching programs).

5. Finances

One year's program for the totality of the schools amounts to 10-15'000 US$. The program is entirely financed by the agriculture schools through a common pool, but they are refunded by the swiss federal government for about 40% of the costs.

E. Evolution

The program has started two years ago in 3 of the 7 schools; in the second year the 4 remaining ones were included too.

The program has evolved very differently according to the specificity and the dynamic of each school. This evolution has also to be seen in the light of the region, of which each school is a part, as well as in the light of the institutional organization of each school.

Some schools are extremely dynamic and see the continuing education of their teachers as a means to promote the scope and the quality of agriculture education in their region, whereas other schools see the same continuing pedagogical education of their teachers as a threat to the actual power structure of the institution.

According to the perception of the program its evolution is different from school to school. It is expected that in some schools the program will more or less die, whereas in others the continuing education of the teachers will become an essential component.

F. Influences

The major influence which has contributed to the setup of the program is actually the external pressure put on the swiss french agriculture schools by the swiss german ones. In fact, teachers in the swiss german agriculture schools do not only have a basic pedagogical education for their teachers, they also already have institutionalized a system of continuing pedagogical education. The program has therefore mainly been set up in order to stay behind the swiss german schools, as well as not to be excluded from federal financial support.

This origin of the program has at the same time a negative aspect, which hinders the program to be fully effective: in some of the schools the program is seen as being imposed by external pressure, although - it is argued - there would actually be no need for pedagogical education of agriculture teachers.

GUIDELINES

Project Plan
4/88

A WORLD PERSPECTIVE: AN INTERNATIONAL COMPARATIVE ANALYSIS OF EDUCATIONAL PROGRAMS FOR ADULTS

Overview

During 1986-88, adult education scholars and practitioners from more than twenty nations throughout the world will cooperate on a cross-national adult education project. The purpose of the project is to understand the ways educational programs for adults function in society. Cross national similarities and differences will be analyzed and the results reported.

The overall project coordinator is Alan B. Knox, Professor of Adult Education, University of Wisconsin, USA. Working with Professor Knox on the project will be his wife, Linda Bock Knox, an experienced adult educator and writer, who will be helping with data collection and project coordination, and Professor Dušan Savićević, University of Belgrade, Yugoslavia, who will be helping with the comparative analysis.

In each of the nations included in this project an adult educator will serve as a coordinator for the preparation of case descriptions of educational programs for adults important in their nation. Types of programs might include: educational programs focused on literacy, agriculture, workers, continuing professional education, part-time secondary education completion, part-time higher education completion, health, family, leisure, citizen role, and underserved populations.

Each case study will describe the program in terms of its outcomes, process, inputs, past evolution, current influences, and how and why the program functions as it does in its national context. In addition to the comparative analysis and published report of case descriptions by Knox, Knox, and Savićević, each case coordinator will receive a complete set of case descriptions from other coordinators and will be encouraged to conduct their own analysis focused on implications for their own national setting and prepare their own reports. Copies of the project report and case descriptions will be sent to libraries and institutes around the world.

For additional information, contact:

Madison, Wisconsin 53706, USA
Phone: (608) 263-2937

NOTE: The term adult education refers to all types of part-time and short-term formal, informal, and non-formal educational activities for all categories of adults about any subject matter content.

A. Purposes of project: to prepare a report that will enable adult educators around the world:
   1. appreciate the wide diversity of adult education programs regarding terminology, activities, and concepts.
   2. understand ways in which such programs function in the society in which they occur.
   3. analyze similarities and differences that can help us recognize options and learn from each other about conditions under which practices produce desirable results.

B. The basic method of the project is in two parts, descriptive and analytic.
   1. One adult educator in each nation participating in this project will serve as case coordinator for that nation. That coordinator may prepare all of the case descriptions of adult education programs for that nation or may cooperate with other people from that nation who may help do so. Prof. Alan Knox (University of Wisconsin, USA) has agreed to serve as overall project director. Each coordinator will arrange for preparation of short case descriptions of typical adult education programs in their nation. The case description will be based on familiarity with the type of program by the person who prepares the case, and may also be based on research or evaluation reports.
   2. Prof. Knox, Prof. Savićević, and other researchers interested in doing so, will conduct comparative analysis based on the case descriptions.
      a. Some of the analyses will be cross national, based on the set of case descriptions, such as literacy, of similar programs in various nations.
      b. Some of the analyses will be based on the set of case descriptions of all programs in one nation or a set of similar nations, and will emphasize programs within a national setting.
   3. The intent is to select nations and programs that are fairly representative, while recognizing that much will be omitted.
   4. The purpose of the guidelines for selection of widespread types of adult education programs and for preparation of case descriptions is to make possible comparative analysis without greatly influencing the conclusions that emerge from the comparative analysis.

Nations to be included - adult educators from about twenty nations have expressed interest in preparing case descriptions for this project. The nations are from all regions of the world [east and west, north and south, large and small]. Together they contain three quarters of the world's population and land area.

Selection of adult education programs for case description - If describing a typical or widespread program in a case that you prepare (or arrange for) in a given category does not reflect the great variation that actually occurs among programs in that category, two or more contrasting cases can be written in that category. All of the comparative analysis and interpretation that occurs subsequently depends on accurate and balanced case descriptions. Such valid cases depend on the detailed familiarity with the program and context by the person who writes the case.

Sections of each case description - Coordinators will arrange for a brief case description (10-20 double spaced pages) for the programs which the coordinator decides to submit. Each case description will be about a typical current or recent local adult education program such as one program coordinator might supervise, and which typically includes a number of teachers. (These cases should not describe either a single teaching episode or an entire national program.) For widespread national programs, select one or more local or regional examples that functions under the supervision of a coordinator. The purpose of the case description is to increase our insight and understanding of how the program functions in its societal context, and not to evaluate it. Special attention should be given to linkage that program staff provide between client systems of adult learners who are served and resource systems of experts and others who help to plan or conduct programs. We encourage you to prepare your case in such a way that if someone else were to do so independently for the same program, the result would be very similar.

Listed below are proposed categories of information for each case example, to facilitate comparative analysis. Each case may describe a typical specific instance, or may summarize average programs based on available information. Formal, informal, or non-formal educational programs may be included, and for each category listed below, a brief paragraph or two should provide a sufficient description and explanation of the essential characteristics of a typical program. Categories A, B, C, and D will constitute a descriptive portrayal of the program as a system.

A. Setting - Type and size of the provider organization, including the size and characteristics of the service area of program.

B. Outcomes
   1. Goals - Program goals, content and intended outcomes (Include the major stated objectives, the types of people and groups that influence goals, and the process of gaining agreement on these goals and objectives. Indicate the main societal benefit that the program tries to serve, such as assimilation of immigrants, increased agricultural production, or modernization of technology).
   2. Benefits - Evidence of actual program benefits to learners and others (based on evaluation findings or general impressions).

C. Process
   1. Planning - Program planning (including who conducts needs assessment and/or context analysis, and how they usually do so, along with other major planning arrangements, such as objectives and activities, and use of plans).
   2. Methods - Methods of teaching and learning (including main types of methods and materials for helping adults learn).

3. Improvement - Program improvement (including evaluation and improving the performance of program staff).
4. Participation - Encouraging participation and responsiveness to learners (including counseling and other ways to retain learners in programs).

D. Inputs - Numbers and characteristics of people and resources that are acquired for the program to function, along with the procedures to obtain them. For example:
   1. Participants (numbers and characteristics of learners or students and average number of hours spent in the program each week)
   2. Needs (indication that a problem or educational need existed that the program should address)
   3. Staff (number of full time equivalent administrators, teachers, discussion leaders, coordinators and other staff members)
   4. Content (major subject matter fields)
   5. Finances (money and in-kind support from any source)
      To describe general levels of financial support and expenditures for this program, estimate the total amount of annual financial and in-kind income and support that the program receives to cover all instructional and other direct program costs. (Do not include indirect costs.) Using that total budget level for the program as a base, compute and report the percentage of program income and support from government funds, fees paid by participants, and all other sources combined. Also, report the percentage of the total budget that is used to pay staff salary and wages.
   6. Facilities, equipment, materials
   7. Other (including feedback regarding outcomes that influence inputs and process)

E. Evolution - Brief history of major program trends to describe how this program started or evolved, and the major past influences that helped and that hindered its development.

F. Influences - Major current societal influences from the past few years and now that affect stability and change in the program's functioning and outcomes. (Examples could include: financial support, government policies, economic status or conditions, religious or social traditions, available volunteers and staff.) The influences could be local, regional, national, or international.
   1. Positive influences that help or contribute to the program's effectiveness or success.
   2. Negative influences that hinder or make it difficult for the program to be effective.

G. Other - Any other brief comments that help explain how and why the program functions as it does in its societal context. Illustrative comments could include clarification of important variables, indications how how the selected program differs from others of its type in your nation, opinions about widespread values and beliefs relevant to the program (description of important adult education staff roles), and your own perspective and interpretation of activities and meanings. Pertinent articles, reprints, statistics, and bibliographic citations that would clarify the program for readers are also welcomed.
